OUTPUT

```
Linked List: 3, 5, 7  
  
-----  
Process exited after 0.3578 seconds with return value 0  
Press any key to continue . . .
```

Explanation

This defines a simple linked list with operations to add a node at the start and the end of the list. The `addAtStart` method adds a node to the beginning, while `addAtEnd` appends a node to the end. The `printList` function outputs the entire linked list in a readable format.
