LAB 5

OUTPUT

```
Linked List: 25 -> 12 -> 19 -> 5 -> 7
First Node: 25
Last Node: 7
Middle Node: 19

-----
Process exited after 0.3905 seconds with return value 0
Press any key to continue . . .
```

Explanation

This creates a simple linked list where we can add nodes at the beginning, end, or at a specific position. It also allows us to display the entire list, as well as the first, last, or middle node. The linked list is a structure where each node points to the next node, forming a chain.
